Mr. Mitchell Smith
Superintendent Waste Water Treatment Plant
1501 West Markland Ave.
Kokomo, IN 46901

Dear Mr. Smith

On July 10, 1998 I received the results of our tests for zinc by NET Labs. The reading for zinc was 2.3 our maximum is 2.10. We have done some checking and have no reason for this high of a reading. Also, as of July 14, 1998 our Treatment facility was put into operation. It seems to be operating very well. We have very high hopes that this will eliminate our zinc problem.

I called on July 10, 1998 to report this reading. The time was 4:00 P.M.. I talked to the lady that answers the phone she said that she would give you the message.

Sincerely,

Richard Tyler
